## We're Tight With Customers Who Need Special Fasteners.

We're building relationships with some of the most demanding automotive OEMs in the world. We understand their fastener specifications. We have industry-leading experience in designing dies for long life and superior thread quality. We have an enviable record in just-in-time delivery of the highest-quality parts. And we'd like to work with you. For new or special fasteners, we have a reputation for innovation, so we can work with you to design dies and make parts that others can't — like some of our hex-flange shoulder bolt specials.
